

# BRIO

12 Series

 **WORKSEATS**<sup>®</sup> Technology

Milagon's Brio Series chair is the "work horse" of our seating line. Brio brings innovation and performance together with one purpose in mind: Optimal seating in the workplace. The soft, comfortable polyurethane foam seat pan and backrest are featured for maximum wear and durability. Both are mounted to a cast aluminum mechanism providing a -4° to +10° tilt of the seat and a 10° + or - the angle of the backrest with a spring tensioned, clutch mechanism. Self-skinning polyurethane is an ideal material for multi-shift environments as well as any application where hygiene is a concern.

- Industrial strength modular construction
- Ergonomically designed
- Independent seat tilt and backrest adjustments
- CAL 117-133
- Choice of Cast or Polished Aluminum Star Base or Enamel Disc Base

Self-skinning polyurethane seating is chemical resistant and tough enough to withstand harsh industrial environments

Viscoelastic PUR integral foam with thermosensitive properties

Shock absorbing sealed pneumatic gas cylinder is unsurpassed in providing state of the art excellence in seat height adjustment

Self-skinning polyurethane seating is chemical resistant and tough enough to withstand harsh industrial environments

Viscoelastic PUR integral foam with thermosensitive properties

Shock absorbing sealed pneumatic gas cylinder is unsurpassed in providing state of the art excellence in seat height adjustment

The molded polyurethane backrest and seat surface promotes air circulating breathability for maximum comfort

Simple and efficient handle adjustments for tilt, height, and backrest support

Durable cast aluminum base resists fractures and damage that can happen with plastic and/or steel tube bases

### Optional Accessories:

- Armrest
- Foot Ring
- Safety Step-Up Rail
- Self-Breaking Casters

### Available Colors

■ Black
